Macroeconomics

- Macroeconomics is the economics of economies.
- Macroeconomics studies economies when taken as a whole and, in particular, investigates how an economy works.
- As distinguished from microeconomics, macroeconomic analysis minimizes what is taken as given.
- The central concerns of macroeconomics are
 - macroeconomic fluctuations (Great Recession)
 - long-term economic growth (Great Divergence).

The magnificent seven

- This course focuses on macroeconomic fluctuations and, specifically, proposes explanations of the behaviour of the seven following variables.
 - GDP – measure of economic activity
 - inflation rate – measure of economic stress
 - interest rate – basic price in the financial sector
 - exchange rate – foreign price of currency
 - unemployment rate – performance indicator
 - government budget deficit (also government debt)
 - foreign deficit – trade balance in deficit

Main theoretical lessons

- This course relies on three insights to explain how an economy operates and generates outcomes.
 - Feedback processes account for the persistence of certain phenomena through multiplier effects: economic growth, unemployment, inflation...
 - Optimizing behaviour by the agents of the economy justify the simultaneous attainment by several markets of stable states (e.g., arbitrage).
 - Limits to what a government can do, control or achieve in an economy (policies must take into account how people react to them).

Bibliography

- No textbook covers adequately the material of the course. Lecture notes and problem sets available on the web page.
- Textbooks present (orthodox) macroeconomics as a discipline with definite answers. For instance:
 - B Bernanke, R Frank: [Principles of Macroeconomics](#)
 - C Jones: [Macroeconomics](#), International Student Ed.
- This is not the case: there is a heterodox approach.
 - SM Kohn: [Reintroducing Macroeconomics](#)

Marks

- 1st examination period
 - 30% of the final mark obtained from multiple choice exams and one mid-term exam. Answers to selected exercises in problem sets should be delivered before closing dates to be announced.
 - 30% from an end-of-term exam on all the topics to be taken the last day of the course (21 May 2015)
 - 40% from the official final exam (2 June 2015, 12:00)
- 2nd examination period
 - 100% from the final exam (22 June 2014, 12:00)

Warnings

- Spelling and grammatical mistakes will be taken into account when correcting written exams.
- More than 10 serious grammatical mistakes will result in a zero mark in the corresponding exam.
- Calculators and similar computing devices are not allowed when taking an exam.
- Answers in pencil are invalid. Use ballpoint pens.
- It is necessary to obtain at least 5 in the final exam.
